

New Integrated Dotworkz IP Camera Housing and AvaLAN 5.8 GHz Wireless Ethernet Bridge

Robust and Reliable 5Mbps Wireless Ethernet Bridge

Huntsville, AL., October 5, 2010– AvaLAN Wireless Systems, Inc. announced this week the integration of its 5.8 GHz Wireless Ethernet Bridge with an Outdoor PTZ Camera Housing from Dotworkz. The New AW-D2-5800HTP is a matched set of radios, one integrated into a PTZ camera housing, preconfigured as a point-to-point Ethernet bridge. This new 5.8 GHz wireless Ethernet Bridge is designed for higher data rate applications up to 5 Mbps. This higher data rate is needed to support IP-based megapixel surveillance cameras. Versatile, virtually indestructible and ready for extreme conditions, the Dotworkz enclosure is not just a camera enclosure but an engineered outdoor housing system that is designed to enable indoor camera models to be used in rugged outdoor system environments. Dotworkz produces the world's toughest camera enclosures. They will not corrode, rust or leak and have proven to withstand a extreme abuse. AvaLAN is continuing their IP security market leadership position by providing robust and reliable wireless solutions for security applications, access control, industrial automation, remote sensing and remote control markets. No other company can match the price-performance characteristics of AvaLAN's products.

"This new higher throughput Ethernet Bridge with camera housing showcases AvaLAN's technological leadership through a unique combination of innovation and reliability," said Matt Nelson, CEO and President of AvaLAN Wireless.

The new AW-D2-5800HTP long range 5 Mbps industrial outdoor wireless Ethernet product is now shipping and available with a manufacturer's suggested retail price of \$3499 USD.

About AvaLAN Wireless Systems, Inc.

AvaLAN Wireless ("AvaLAN") is an industry leader in the ultra long range [industrial wireless](#) Ethernet market. To date, the Company has manufactured and delivered over 30,000 of its radios to the networking, surveillance, digital signage, robotics, and access control markets.
