

# Hotspot

Deliberant AP can easily create hotspot's zone network on 2.4 and 5 GHz unlicensed band. IEEE 11n lets achieve (depending on laptop, smart-phone or PDA capabilities) great throughput and support all possible client equipment (based on IEEE 802.a/b/g). Hotspot zones can be created indoor or outdoor. WLAN hotspots are very popular on petrol station, shops, bars, restaurants, public places and other resorts.
