Grandstream IP Telephony Achieves Interoperability With Vitelity SIP Trunking

Certification Offers Complete VoIP and Hosted VoIP Solutions for SMBs and Residential Customers

Brookline, MA and Englewood, CO (June 12, 2012) – Voice over IP (VoIP) technology provider Vitelity Communications and Grandstream Networks, the leading manufacturer of IP voice/video telephony and IP video surveillance solutions, today jointly announced interoperability testing and certification of Grandstream's IP Telephony products with Vitelity's SIP trunking services is complete. Small- to medium-sized business (SMB) and residential users adopting Vitelity's VoIP and Hosted VoIP service for better financial savings, flexibility and enhanced productivity applications can seamlessly deploy Grandstream's desktop IP Telephony products, including all GXP IP Phones and GXV IP Multimedia Phones.

Vitelity Communications offers unique and flexible VoIP solutions for customers worldwide. "We are thrilled to offer our worldwide customers the opportunity to take full advantage of, and realize the extreme quality of Vitelity's VoIP service offerings by using Grandstream IP phones for the best possible user experience," says Kerry Garrison, Vice President of Strategic Initiatives at Vitelity. "Customers connect with the Grandstream brand – with its value, reliability, and ease of use. We value this strategic partnership and look forward to jointly evolving our IP offerings to benefits the needs of our customers."

Grandstream GXP Series of Enterprise SIP telephones provides affordability, best-in-class HD audio, a comprehensive set of advanced call features, multi-language support, security protection, simplified management and automated provisioning with TR-069 or HTTPS, advanced XML customization and more. For customers seeking a more advanced, integrated multimedia experience with free real-time video calling capability and instant access to real-time web and social multimedia applications, Grandstream's award-winning GXV IP Multimedia Phones are available.

"Working with partners like Vitelity is extremely important for users because it saves time, eliminates any compatibility risks and speeds the implementation of VoIP," said David Li, CEO of Grandstream. "We look forward to extending our family of IP telephones to Vitelity customers and showing them how easy it is to use VoIP to enhance their business and personal lives."

About Vitelity

Vitelity is a privately owned, international voice over IP (VoIP) technology provider. Vitelity offers wholesale voice, fax, SMS, and hosting services. Vitelity ensures network reliability by operating its own 50Gbit private dark fiber network and through interconnections in major cities throughout the United States, including Denver, New York City, Los Angeles and Miami. Vitelity maintains a five-star rating from VoipReview.org, maintains an "A" rating with the Better Business Bureau and won IT Expo's most innovative new product award in 2009 and 2010.
