NEW PROTOCOL FOR LIGOPTP MIMO EQUIPMENT

Download NOW!

jet MiMo2 New protocol with improved distance and performance

The image shows an aerial view of a field with a large, 3D, green and white text overlay that reads "Download NOW!". Below the text is a logo for "jet MiMo2" which consists of a green circular graphic with the word "jet" inside and "MiMo2" below it. The background of the image is a dark, overcast sky over a field.

Successful tests in Mexico

Some customers also had a chance to test the latest firmware and see what results they can achieve on long-distance links. LigoWave customer in Mexico was happy to try out the new beta software and achieved such results on their 3 links:

- Tule(hill) - Culagua(hill) - 70 Km link - Throughput 74 Mbps
- Culagua(hill) - La viga(hill) - 47 Km link - Throughput 122 Mbps
- La viga(hill) - Neveria(hill) - 77 Km link - Throughput 70 Mbps
